SERVICES**

OUR SERVICES

ABOUT TIS

TIS is a UK industrial services provider offering a wide range of fabric maintenance and access support to oil & gas, process and energy, infrastructure and marine sectors.

Our experienced and qualified teams of operatives are here to help you with your fabric maintenance and provide access solutions to your projects and assets.

TIS provides a wide range of services including:

INDUSTRIAL PAINTING

SCAFFOLDING

ROPE ACCESS

INSULATION

INDUSTRIAL CLEANING

01

WHATEVER THE SIZE, WHEREVER YOU ARE

Our diverse service portfolio is aimed to cater to your needs; from small projects, to turnarounds and term maintenance – our team can support you wherever you are.

Our experience spans to both offshore and onshore work, including assets such as power stations, offshore platforms, FPSOs, refineries, windfarms or bridges.

02

YOUR SAFETY IS OUR PRIORITY

TIS is an ISO 45001 certified company, with our robust safety management system underpinning every aspect of our work. We are a member of many national and international bodies such as IRATA, NASC, CHAS to provide you with safe mind when choosing us as your contractor of choice.

03

WITH QUALITY AND ENVIRONMENT IN MIND

TIS strives for continuous improvement in the quality of work, without the detriment to our environment. Our company is ISO9001 and ISO14001 accredited ensuring our work is completed to the highest standards to protect your assets and your people.

INDUSTRIES

TIS supports a wide variety of industries and sectors, providing fabric maintenance and access solutions to ensure prolonged longevity of your assets.

OIL & GAS

- Offshore platforms
- FPSOs
- Oil & Gas terminals
- Refineries
- Oil & Gas onshore pipelines

PROCESS & ENERGY

- Wind farms
- Nuclear power plants
- Hydroelectric power plants
- Conventional power plants
- Pharmaceutical plants
- Manufacturing plants
- Chemical plants

INFRASTRUCTURE

- Bridges
- Pylons and electrical substations
- Onshore water pipelines

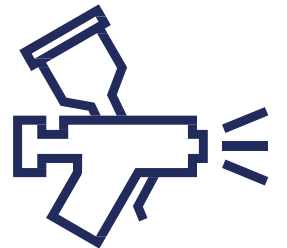

MARINE

- FPSOs
- Ferries
- Naval vessels
- Cruise liners
- Tankers
- ROROs

OUR SERVICES

INDUSTRIAL PAINTING

TIS provides support to painting and refurbishment projects including bridges, marine vessels and industrial sites that require the technical project management skills and knowledge of application.

Wide range of services

Surface preparation

- Grit blasting
- Sand blasting
- UHP blasting
- Vacuum blasting recovery systems
- Mechanical surface work preparation

Protective coatings

- Passive fire protection (PFP)
- Thermal flame metal spraying
- Arc metal spraying
- Epoxy and alkyd materials
- Solvent-free applications
- Non-skid deck coatings
- Anti-fouling coatings
- Vinylester/ polyester linings

INDUSTRIAL EXPERIENCE

Our team undertakes projects on petrochemical, infrastructure and renewable sites. With qualified painters and experienced management, TIS provides one stop shop services such as pre-surveys, specification, blasting and UHP cleaning, surface preparation and application.

With robust planning and cost control you can be assured of quality work undertaken within your project timeframe.

PROLONG THE LIFESPAN OF YOUR ASSETS

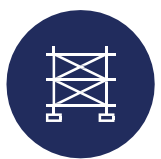

With our industrial painting services your assets are provided the necessary protection from the elements. Our experts are here to advise you on the right methodology to ensure enhanced protection that suits the requirements of your asset.

Our experience spans many industries including oil & gas, infrastructure, process and energy, pharmaceutical and marine work.

INDUSTRIAL PAINTING

Various surface preparation and specialist protective coating services

SCAFFOLDING

Tube and fitting, system scaffold & design

ROPE ACCESS

Qualified IRATA operatives offering fabric maintenance support

INSULATION

Thermal, cryogenic & acoustic protection to pipe infrastructure

INDUSTRIAL CLEANING

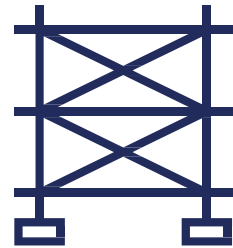

Comprehensive industrial cleaning services across various sectors

SCAFFOLDING

TIS supplies scaffolding services to help you reach your maintenance projects in the process and energy, oil & gas and infrastructure industries.

Our scaffolding services allow you to access areas undergoing maintenance, to undertake inspection work and to assist with shutdowns and emergency works.

SCAFFOLD DESIGN

We have access to a highly sort after scaffolding design team who will assist you with all your technical queries and provide you advice on your scaffold design options.

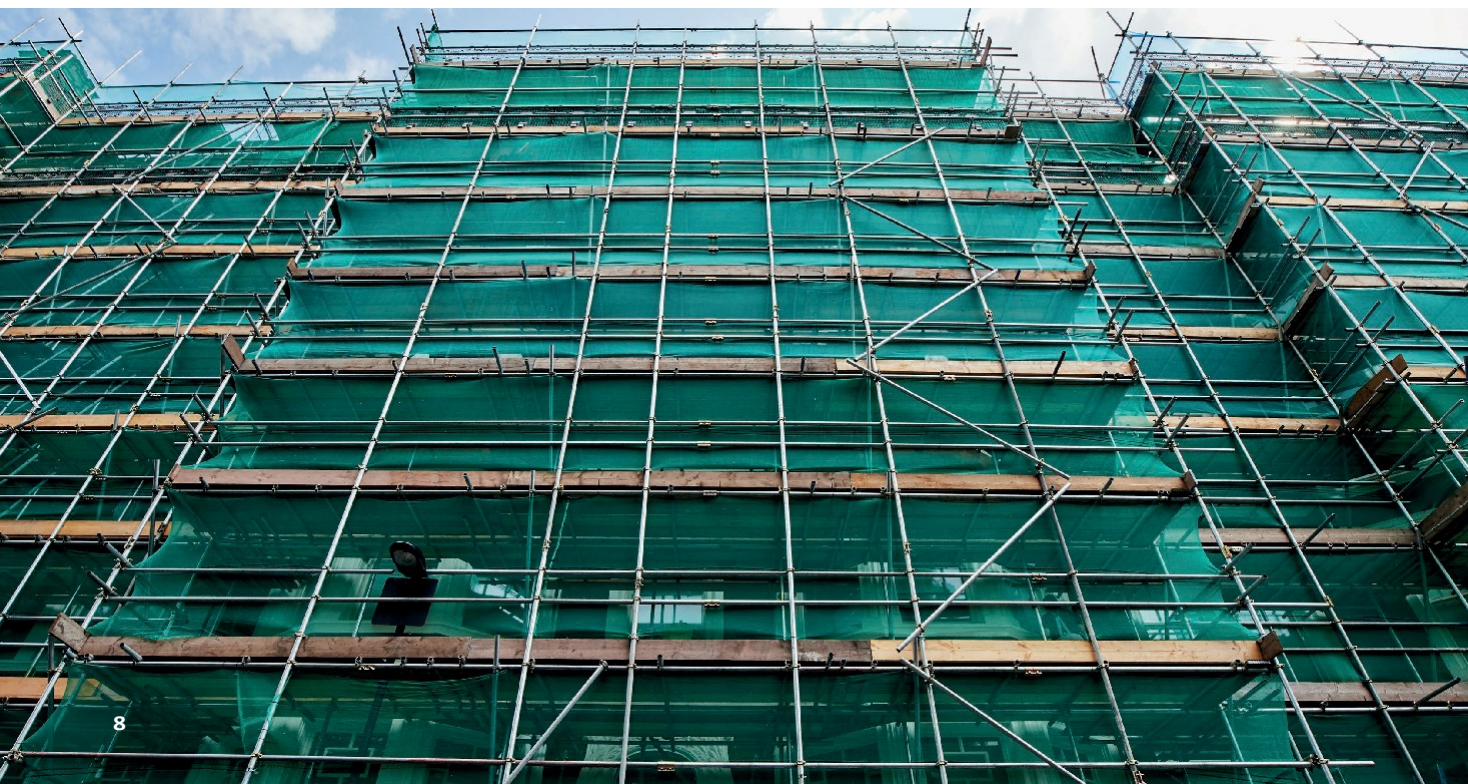

TIS is part of the National Scaffold Association and are currently working towards NASC membership.

Our team of experts can provide you with custom built solutions, to minimise the project cost and to increase your teams efficiency, these utilising all forms of access being Rope Access, Mechanical Access and all forms of Scaffolding.

SCAFFOLDING INSTALLATION

Our trained and certified scaffolding team provides you with the high level of expertise and experience to ensure the safety of your workforce. Our team can support you with various levels of installation complexity in the infrastructure, process and energy, oil & gas and construction projects.

Our stock includes various types of scaffolding: from tube and fitting to the latest system scaffold solutions. Our scaffolding department can advise you on the right type of scaffolding to maximise your project's productivity and decrease the installation costs.

ROPE ACCESS

TIS has an extensive experience in offering rope access services as an alternative to our other industrial services.

Our highly skilled, multi-discipline IRATA qualified operatives ranging from Level 1 to Level 3 are here to help you in your maintenance or construction projects. From maintaining offshore platforms, refurbishment of bridges, petrochemical shutdowns to installation of wind farms – TIS rope access team is here to support your project requirements.

EXPERIENCED OPERATIVES

Our experienced team is here to help you reach the difficult to access areas, where the cost of scaffolding is high, or where using other access alternatives is not possible.

Our IRATA rope access operatives undertake rigorous selection process and skill assessments to ensure that we can provide you with the best team fit for your projects.

IMPROVED CONTROL OF YOUR PROJECT

Choosing rope access allows you for rapid mobilisation and set-up in time-critical, emergency works. With the removal of scaffolding or mechanical access methods, your project costs are under control, minimising the disruption to your daily site activities. TIS rope access teams can be rapidly mobilised to a range of challenges, providing you with a solution to your problems from day one.

SAFE ACCESS

Our rope access personnel is trained in using EN compliant rope access equipment. TIS team follows our strict equipment inspection procedures to ensure the safety of our team and others around.

Multiskilled Crews

TIS rope access operatives are trained and certified trade professionals including:

- Industrial painters
- Insulation operatives
- Electrical & instrument technicians
- Industrial cleaners
- NDT inspectors

INSULATION

TIS offers thermal, acoustic and cryogenic insulation services to protect your pipes, ducts, tanks, boilers or other vessels for oil and gas, process & energy and manufacturing industries.

PROLONGING THE LIFESPAN OF YOUR ASSETS

With our installation and removal of insulation systems, we can help you extend the life cycle of your assets.

Our team can offer a wide array of insulation options to prevent corrosion, reduce noise, preserve heat, provide passive fire protection and waterproof your installations.

Our services are widely used on industrial sites including: refineries, oil & gas terminals, pharmaceutical and power plants.

CHOOSING THE RIGHT SOLUTION

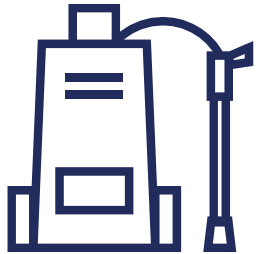

Our team of experts can offer you advice on the correct type of insulation material to be used as well as various finishes options to suit your budget and specification needs.

Our team can provide you with one stop shop services, to minimise your project costs – our operatives will remove and dispose of your old insulation and provide fitting of the new materials including post-fitting inspection services.

INDUSTRIAL CLEANING

Our equipment and specialist teams have extensive experience in industrial cleaning in the oil & gas, marine and process and energy sectors.

Our capabilities include:

- High and ultra high pressure water jetting
- Tank and vessel desludging and cleaning
- Vacuum transfer and pumping solutions
- Asbestos management and removal
- HVAC and duct management
- NORM management
- Surface preparation
- Environmental waste management
- Hydrodemolition
- Inspection services

ENVIRONMENT FIRST

TIS industrial cleaning operatives work according to ISO 14001 standards, to ensure that no work is performed to the detriment of the environment. Our experience extends to both onshore and offshore work, providing you with innovative and cost-efficient solutions, whilst minimising the contamination risks to water or ground.

EXPERT CLEANING

Our team works relentlessly to provide you with a comprehensive industrial cleaning services portfolio. Our certified operators can serve your complex projects requirements, regardless of the required method of access.
