

ENVIRONMENTAL POLICY

TIS (NGA) Limited recognises both the importance of prevention of pollution and the benefit of avoiding the greater cost of rectifying damage after the event, and therefore commits to implement and maintain an environmental policy in compliance with ISO14001:2015

The company commits to: -

- Review environmental business objectives based on our compliance obligations and consider risks and opportunities.
- Improve where economically and operationally feasible, protect the environment, prevent pollution, and meet contractual requirements, applicable statutory, authoritative, and regulatory requirements by the use of environmental procedures.
- Minimise waste to landfill by considering the recyclability of products at their end of life and by segregating and recycling waste where economically and operationally feasible.
- Fulfil all legal and compliance obligations.
- Continually improve the environmental management system to enhance company environmental performance.
- Communicate this policy within the company and to all interested parties.
- To operate and maintain vehicles, plant and equipment in a responsible manner so as to provide the maximum practicable environmental protection.
- To provide the information and instruction necessary to ensure all materials used by the Company are properly stored and used and that waste is safely contained and disposed of
- To control the incidence of noise, emission of odour or dust into the atmosphere, road vehicle movement and the production of effluent to the lowest practicable level.

The environment is our future. Waste elimination is our strategic intent.
